Professional Gold Leafing

Corporate Sponsors Society of Gilders

Gold Leaf Gilding is an art craft dating back hundreds of years. An artist's confidence in his ability begins with using the finest products, tools and materials available combined with today's technological advances in craftsmanship for the best possible results.

Easy Leaf Products is dedicated to supplying the highest quality Genuine Gold Leaf and Composition Metal Leaf products as well as related accessory items available to the gilding industries.

West Coast based, we are the one supplier for all your gilding needs. With the wide variety of techniques and applications used in traditional and contemporary gilding today, our product line has grown into the most extensive in the industry and continues growing as we serve our customers' needs.

Our steady, solid growth has been the result of our commitment to satisfying your needs and providing excellent service that is convenient, reliable and profitable for you.

Please take your time and look over our Price & Product Catalog. We welcome any inquiries or special requests that you may have. Our Customer Service Department is always ready to help.

Genuine and Composition Metal Leaf Information

Genuine Gold Leaf

Booklets

Size:

3 3/8" x 3 3/8" (85mm x 85mm) and 3 1/8" x 3 1/8" (80mm x 80mm) on selected karats
3 3/4" x 3 3/4" (95mm x 95mm) for Genuine Silver

Packaging:

500 leaves per pack (covers approx. 39.60 sq. ft.)
20 booklets per pack and 25 leaves per booklet (covers approx. 1.98 sq. ft.)

Loose or Surface - Each leaf is inserted between bound tissues pages of a book. A gilder's knife is used to carry leaf to a cushion if it is to be cut. A gilder's tip brush is also used to lift whole leaves or cut pieces from the cushion. Loose leaf is versatile - use for interior projects and flat, horizontal or ornate surfaces.

Patent/Transfer Paper - Gold leaf mounted by pressure to individual tissue pages. Each page can be lifted by hand from the book. You can easily use this product outdoors, and cut the mounted leaf with scissors. The leaf will stay on the tissue until it is pressed onto the prepared surface and the tissue backing is removed. Not suitable for water gilding.

Double - Loose between paper, approximately 10% heavier in weight and thickness. Ideal for burnishing and modern gilding.

Rolls/Ribbons

Size:

23 Kt. - approximately 4" (102mm) wide and 67' (20.5m) long
12 Kt. - approximately 4" (102mm) wide and 67' (20.5m) long
Genuine Silver - approximately 5 1/2" (140mm) wide and 164' (50m) long

Composition Metal Leaf

Booklets

Size:

5 1/2" x 5 1/2" (140mm x 140mm)

Packaging:

500 leaves per pack (covers approx. 105 sq. ft.)
20 booklets per pack and 25 leaves per booklet (covers approx. 5.25 sq. ft.)

Composition Metal Leaf

Schlag

Sizes:

6 1/4" x 6 1/4" (160mm x 160mm)
5 1/2" x 5 1/2" (140mm x 140mm) - For Everbright Schlags Gold 2 1/2 and Aluminum/Silver only.

Packaging:

Each unit of 1000 leaves is wrapped in paper with tissue paper between every 100 leaves.

Schabin

Sizes:

Large broken or irregular leaves with an approx. size of 4"-6".

Packaging:

Packed in either weight of 1 or 5 kilo box

Abburstig

Sizes:

Small flakes or scrap leaves with an approx. size of 1/4".

Packaging:

Packed in weight of 1 lb. box

Edible Gold and Silver (For Food)

Paolo Angeletti Gold - Italian
Brand Code: PAG

Giusto Manetti Bartiloro - Italian
Brand Code: MAN

Our Line of Genuine Gold Products are designed particularly for the decoration of food and beverage, allowing you to transfer to your tabletop all the magic of this precious material and bringing an ancient Renaissance tradition back to life.

Available in three forms: Powder (for dusting any kind of food surface), Petals (facilitating the adornment of appetizers, desserts and chocolates with relative ease) and Sheets/Leaves (allowing you to solidly cover any food surface).

All of our Pure Gold Leaf Products are manufactured with extreme care and controls and adhere to the FDA Guidelines of edibility.

Gilding Adhesive/Sizing

The Original

Wunda Size/Synthetic Gold Size (Water Base)

Gilder's #1 choice for sizing. 15 minutes water-based Synthetic Gold Size is specially formulated for every type of Gold or Silver leaf work. Its tack time is 15 minutes and will hold for up to 24-30 hours depending upon atmosphere and surface conditions.

Size	Price
8 Oz.	\$6.00
Pint	\$12.00
Quart	\$19.00
Gallon	\$50.00

Gold Size (Oil Base) **DUX**PAINT

Slow-Set

A clear gilder's adhesive (size) for slow leaf work. It affords excellent durability, flexibility and longer open time for interior and exterior surface gilding applications. SLOW SET gilding size will achieve tack in approximately 10 to 12 hours and the tack will remain for approximately 24 hours. Total hard dry occurs in about 72 hours. It should be noted that tack and dry times are subjective to the gilder's technique, thickness of the film and are approximate depending on the ambient temperature and humidity when applied.

Quick-Dry

A clear gilders adhesive (size) for fast leaf work. It affords excellent durability, flexibility and open time for interior and exterior gilding applications. QUICK DRY gilding size will achieve tack in approximately 1-1/2 hours and the tack will remain for approximately the same period of time. Total hard dry occurs in about 36 hours. It should be noted that tack and dry times are subjective to the gilder's technique, thickness of the film and are approximate depending on the ambient temperature and

Quart	\$37.00	\$35.50
Gallon	\$125.50	\$119.50

Gilding Sealers

Burnish Sealer **DUX**PAINT

BURNISH/SEALERS for gilding and graphic arts are finely ground pigmented products that eliminate the requirement for separate applications of a sealer, gesso or bole. They produce a smooth surface requiring no or very light sanding. This is not for use as an architectural coating.

The BURNISH/SEALERS currently are available in Yellow Ocher and Venetian Red. They can be intermixed to create varying color effects when gilding with gold, silver, aluminum, copper and composition leaf. Due to its unique formulation, the BURNISH/SEALERS can be used on many substrates such as wood, plaster, metals, stone, concrete and composition surfaces.

The BURNISH/SEALERS will seal the surface providing excellent adhesion for gilding and permit a high burnish, with a minimum of rubbing, when built up with multiple coats.

BURNISH/SEALERS are manufactured utilizing premier resins exhibiting excellent adhesion and moisture resistance. The pigments utilized are recommended for gilding applications due to their lasting performance and color retention. The BURNISH/SEALERS are excellent for use on exterior items such as weather vanes and caducei made of copper, bronze, steel or iron.

Colors: Venetian Red, Ochre Yellow and Gray

Acrylic Topcoat **DUX**PAINT

Acrylic topcoat for gilding, artwork, hobby & graphic arts use is a non-reactive premium water clear vehicle composed of acrylic copolymers with outstanding characteristics. It's viscosity allows application by brush or spray over gilders leaf requiring protection from abrasion, water, ultra-violet and chemical resistance. It is not intended for use as an architectural coating.

Burnishing Clay

Selhamin Poliment Clay (Dry Cones)

Selhamin Poliments imported from Germany. Available in master quality and in many different colours. The range includes, for example, Calabrian black, Piedmont red, Ligurian yellow and Amalfi blue. Depending on your personal processing preferences, these Poliments are available in solid form as cones or in paste form packed in jars.

In the poliment gilding technique, superfine gold leaf is attached to a poliment base consisting mainly of clay. Under this lie several layers of chalk, bound together with leather glue.

A gilded surface owes its character to the natural colour of the gold leaf, the colour of the poliment and the tone and patina produced as the surface is treated. There are thus many varieties of poliment-gilded surface.

Mixol Universal Tints

MIXOL is the painter's favorite companion. For over 30 years, MIXOL has been added to paints, varnishes and clear coatings to produce an endless palette of colors. It is simple to use, produces consistent results and offers the artist a single product that meets the needs of almost any tinting application.

- MIXOL is a binder-free multi-purpose universal tint. It is not a paint and must be added to other materials.
- Always tint the material and thoroughly combine all elements, before thinning to produce a consistent mixture.
- MIXOL will not form a skin or lumps and will not dry out. It may be stored for many years in its original container.
- MIXOL is highly resistant to frost and heat damage, but temperatures below 41 degrees Fahrenheit may cause MIXOL to thicken. If MIXOL should thicken or freeze solid, allow to warm to room temperature, then shake thoroughly, and MIXOL is ready for use again.
- When adding MIXOL to lacquers, a motorized mixing device will produce the best results. As with all materials, always test the mixture to determine the final results.
- Not all materials are tintable. When working with special materials, first perform a test to determine compatibility and to assure that the tints will not separate out.
- All MIXOL tints are inter-mixable with each other. MIXOL colors No. 12-24 can be prepared by mixing the basic colors, No. 1-11, in the weight proportions specified in the Mixol Color Chart.
- MIXOL may be added up to a maximum of 10% by weight, depending on the base material. MIXOL is highly concentrated. The best result is obtained by first adding a minimum amount and increasing the concentration as required. The maximum additions by weight are:
 - 10% Latex or Emulsion Paints
 - 5-8% Paints, Lacquers, Varnishes, High-solids
 - 6% Acrylic Paints
 - 3-5% Transparent or Clear Lacquers, Glazes, Stains, Waxes
 - 3% Silicate Paints or Coating - Use only MIXOL oxide tints No. 4, 5, 14.
- For interior application on new wood and other surfaces, the Universal White Concentrate No. 25 may be added to
 - colorless coatings or transparent paints or glazes to create a picking effect.
 - LW-Type - Lightfast and Weatherproof - Interior and Exterior Applications
 - L-Type - Interior Application Only

MIXOL Multi-Purpose Tinting Paste is a highly concentrated, universal tint. Up to 10% by weight can be added to almost any type of paint or varnish. It is highly resistant to frost and heat damage and is suitable for interior and exterior applications. MIXOL is available

Shellacs

It ranges in color from orange to light yellow depending upon the extent to which it has been purified; the darker shellacs are the less pure. Applied to surfaces such as wood and plaster, the solution forms a hard coating upon evaporation of the solvent. Shellac is widely used as a spirit varnish, homogeneous solution of gum or of natural or synthetic resins in oil (oil varnish) or in a volatile solvent (spirit varnish), which dries on exposure to air, forming a thin, hard, usually glossy film. It comes in different types such as crystal flakes, liquid or spray.

Gilding Starter Kit

Our Gilding Starter Kit comes with everything you need to get started. Not only will you learn how to Gild but you will also be introduced to Metallic Powders. You will get a combination of Leaf and Powder that will last you enough to do several projects yourself. Great for artist, framers and painters who wish to add a new exiting element to their skills. Learn a new skill set that will upgrade your abilities.

Price
\$25.00

Kit Includes:

- 1 Booklet (25 Sheets) Composition Metal Leaf Gold Color 2 1/2"
- 1 Booklet (25 Sheets) Composition Metal Leaf Aluminum
- 1 Booklet (25 Sheets) Composition Metal Leaf Copper
- 2 Oz. Bottle of Bronze Powder: Rich Pale Gold No. 360
- 1 Oz. Bottle of Bronze Powder: Fine Silver No. 361
- 2 Oz. Bottle of Bronze Powder: Fine Copper No. 365
- 4 Oz. Bottle of Wunda Size Gilding Adhesive
- 4 Oz. Bottle of Clear Gloss Mixing Medium
- 2 Half-inch Goat Hair Brushes
- 1 Bag of Cheesecloth

Steel Wool - "*Virtually Oil Free*"

Product Users Guide to Using Metallic Powders & Mica Pigments

TECHNICAL INFORMATION

By N .Cody

GLMP presents the most comprehensive assortment of Metallic Powders offered in Basic Colors, Speciality Colors, Pearlescent, Iridescent and Sparkle Colors.

Metallic Powders are basically made from metal flakes or mica flakes. Metallic powders are the colored pigments used to make metallic paints. You now have the unlimited option of making a wide range of colored metallic coatings using oil/acrylic varnishes, glazes, lacquers, high performance clear coats. The pigment/micro flake size determines the type of finish you will achieve. A coarse powder reflects a brighter, more brilliant finish. The finer the pigment the smoother or duller the finish.

Metal Powders are made of copper, copper & zinc/tin alloys, and/or aluminum. They are skilfully blended together to form a variety of beautiful colors and shades. Metal powders are also heated until a new color develops of the heat oxidized effect. The line of Fired Colors exude dark rich metallic shades. Exterior metal pigments are silica coated for better stability, excellent outdoor durability and tarnish resistance. Exterior pigments are always recommended for usage in exposed areas or harsh damp conditions.

Mica Powders are made from mica and earth pigments. The mica powders are chemically colored for light fastness. Pearlescent, Iridescent colors are transparent pigments allowing light to reflect and refract to create depth and pearlized effects. Mica powders are non reactive and may be mixed with any medium with no concern of unwanted patination/oxidation.

Mixing Guide:

Metal powders add to: Lacquers, Polyurethane, Oil Varnish, Waxes and even Glass (liquified) that will form a film to encapsulate the metallic powder. Avoid mixing metal powders with water based clear coats. Your finish will Patina (turn green unexpectedly).

Mica powders add to: Lacquers, Polyurethane, Oil Varnish, Acrylic Vanishes, Glaze, Epoxy and Waxes. When mixing the powder here are some tips.

- Make a slurry or paste with the thinner used to reduce the medium.
- Water based Clear coats - use denatured alcohol .
- Water based Glaze - use denatured alcohol
- Lacquer - use Lacquer thinner.
- Oil Varnish - use refined mineral spirits.
- Waxes - use turpentine. Then add to the clear coat medium

The higher the quality of clear coat medium used, the better the metallic finish appears. Paint is not recommended to mix powders with as it masks out the metallic powders.

Tip: mix a pearlized mica into a clear coat and coat the paint for a metallic effect.

Mixing ratios for high capacity:

- 4:1 for metal powders
- 7:1 for Mica
- 6:1 for Aluminum

<u>Container Size</u>		<u>Metallic Powder</u>	<u>Clear Coat</u>
Small	2oz	Metal	1 pint
	1oz	Mica	1/3 pint
	1oz	Aluminum	2 pint
Medium	6oz	Metal	1 quart
	3 oz	Mica	1 pint
	3oz	Aluminum	1 pint
Large	16oz	Metal	1 gallon
	8oz	Mica	1 quart
	8oz	Aluminum	1 quart

Clear Coats

The higher the quality of clear coat will give the best results for a metallic finish. The high solids will suspend the metallic powder to create the illusion of depth. Top coating the metallic finish will give added depth and durability.

As a general rule, when combining products from different manufactures, it is advised to contact the manufactures to inform them as to how you are planning to use their products. Their customer service or technical advisor can provide guidance on the appropriate use for their product.

Note: when mixing aluminum powders, mixing in acrylic clear coats and storing is not recommended. Pressure from the slow reaction of water based solvents and aluminum powder will produce gas that will pop the top of the container.

Gilding

Using gold size according to required drying times, from 30 minutes to 24 hours. The most suitable drying time depends on how large a surface to cover. Cover the entire surface with sizing, using a stiff bristle, short haired brush. Brush the size in a thin, even layer. Once the size has the same tack as adhesive tape, apply metallic powder with a soft make up style brush. With out over brushing, build up layers of metallic powder until the color is even. Allow to dry then over coat with a varnish.

Waxes

Wax for antiquing is made by mixing beeswax polish and a little turpentine or solvents. Coloring with oil pigments or metallic powder. Venetian Plaster Wax: add small amount of turpentine to the powder to make a slurry then add it to the Venetian plaster wax. Gilding wax: add small amount of turpentine to the powder to make a slurry then add it to the beeswax polish.

Glazing Glazes are thin with low solids and high solvents. Use the glaze to create a transparent pealized effect. Glazes are not recommended to reproduced solid metallic finishes.

Patina Metal powders will patina when oxidized using corrosive acids, bleach, and vinegar. Mica powders can be given the patina effect with paint and colored glazes.

Guide for Metal Effects:

Metal Powder	Solution	Effect	Finish Coat
Copper	Barium Sulphide	Blackened/Tarnish	Clear Varnish
Brass	Cupric Nitrate & Ammonium Chloride	Blue Green Patina	Do not clear coat
Pale Gold	White Vinegar	Green/Gray	Clear Coat

Intensity of color depends on the length of time exposed to solution. Neutralize the solution with water to arrest the oxidation process.

Base Coats:

Metallic Finish	Base Color
Metal Gold	Red Oxide, Black
Copper	Black, Green
Silver	Gray
Mica Gold	Yellow Oxide
Iridescent/Sparkle	Black
Pearl	Cream

* Remember the smoother the foundation/base, the more realistic metallic finish.

Safety & Handling

- Avoid making the powders airborne.
- Choose to liquify the powder into a slurry using the thinner for the clear coat
- Use a small scoop or spoon to remove the amount of powder needed rather than pour out the powder.
- Wash you hands after using the powders
- For added protection, wear a dust mask.

Terms and Conditions

Ordering Information

For the fastest service please call our Toll-Free Number: (800) 832-2742 or fax at Toll-Free Number: (877) 386-1489. Our friendly Customer Service Representatives are available from 8:15 a.m. to 4:30 p.m., Monday through Friday (Pacific Standard Time). A 24-Hour message center is also available for after business hours ordering. You may email your order to info@EasyLeafProducts.com.

Online Ordering

Please download our Full Price and Product Catalog at <http://www.EasyLeafProducts.com>. Framing Fabrics accepts the following forms of payment - Visa, Mastercard, American Express and Paypal.

Prices

Prices listed within this Price & Product Catalog are wholesale and are subject to change without notice.

Prompt Service

Most orders are shipped same day.

Back Orders

If an item is out of stock, you will be notified and the item back-ordered, unless you request otherwise.

Shipping Policy

For speed and economy we ship via UPS (United Parcel Service), FedEx (Federal Express), CA Overnight (Ontrac) and Affordable Overnight (Just In Time). Urgent orders can be shipped 3-Day Express, 2nd Day Air or Next Day Air upon request, including Saturday delivery. All shipments are insured and shipped FOB our Los Angeles, California warehouse. A \$5.00 per order handling fee applies in addition to regular freight/COD charges. Additional crating charges may apply on certain items.

Terms and Credit Policy

For your convenience we accept Visa, MasterCard, American Express and Paypal payments. Net 30-day terms are extended with approved credit. To establish an open account, please submit a credit application. Past due accounts will be subject to a finance charge of 1 1/2% per month (18% per annum). Payments in US funds only. Delinquent accounts lose Net 30 privileges and become COD or Prepaid. There is a \$25.00 charge to your account each time a NSF check is processed.

General Information

All California accounts must have a valid signed Resale Card on file. Sales tax will be charged on California accounts with no Resale Card on file. California sales tax must be charged on all samples, tools, etc. Kindly download the application form at www.EasyLeafProducts.com.

Guarantee and Return Policy

If for any reason you are not completely satisfied with any of our products you may return the unused item within 10 days for credit or refund. Please obtain a "Return Authorization" from our friendly Customer Service Representatives before returning any merchandise. Please check all merchandise before using. Returns are subject to a 20% restocking charge unless defective or due to our error.

Customer Service

Our Customer Service Representatives are always ready to help you with any questions that may arise. We offer assistance in matters pertaining to framing application techniques. Our aim is to serve you in all your framing needs. Kindly email your inquiries at info@EasyLeafProducts.com.
